Syracuse, NY 13209

President's Message:

Show's over..... we're all tired but happy that things all turned out fine as usual. Beautiful plants, happy judges, and seemed like lots of people there on Saturday and buying! I hope you all were able to get out to see the beautiful displays. Big thank yous to our vendors! Some show results are included in the newsletter.

I think that only a few of you knew that we saved a tiny gecko at the end of the show! It is not much more than a hatchling and is definitely not native to CNY so we assume it came in on an orchid shipped from Hawaii likely. Thanks to Jonathan Jones who saw it on the floor and scooped it up. We have a variety of terrariums so we took it home and I have spent hours researching and then setting up an appropriate home for it. It is a Day Gecko about 1 1/2 inches long and already quite beautiful. It's living in a terrarium with some small orchids, substrate of seedling bark, a water bath, Spanish moss, rocks and logs to climb, and a heat lamp.

Next meeting coming up quickly! Our speaker, Carson Whitlow, does not sell plants so be sure to bring stuff for a raffle table. I have some plants that were given to me by Jeff Snyder of Fairport and they will be donated to the club for raffle.

Sue Finger

### Upcoming Webinars:

*American Orchid Society: Register at [aos.org](http://aos.org)*

*October 9, 2018 - 8:30 PM - 9:30 PM*

*Orchiata Bark,*

*What is Everyone Talking About?*

*Garry Clark*

*(Public Webinar)*

*October 18, 2018 - 8:30 PM - 9:30 PM*

*Greenhouse Chat October 2018*

*Ron McHatton*

*(Open to All; submit questions by Oct. 15th)*

*November 7, 2018 - 8:30 PM - 9:30 PM*

*Greenhouse Chat October 2018*

*Ron McHatton*

*(Open to All; submit questions by Nov. 5th)*

## Minutes: September 9, 2018

**Treasurer's Report:** No treasurer's report. Sue mentioned that our June meeting brought in a total of \$885.00.

**Old Business:** Pipping Rock's Open House had an excellent speaker for the day. Only a small group attended.

**New Business:** October meeting is October 7<sup>th</sup>. We are sharing a speaker with three other societies so our cost will be \$125. The program will be on native plants lasting 40 minutes. Nancy will be hosting on Saturday. Speaker dinner on Sunday at Lock 24 for anyone who wants to attend at your own cost. Some refreshments will be available at the meeting.

Also Jack and Lori are working on the November meeting.

Judy's show report consisted of sign up sheets being passed. Needing people for monitors, clerks, society table, raffle, etc.

To enter orchids please register ahead. Drop off for the church is Thursday by 4. Call Judy, Sue and Jerry to drop off orchids at their homes. Fliers available and were handed out at the meeting.

~ Submitted by Dolores Capella

## THE October 2018 AOS CORNER

From the desk of Denise Lucero, Vice Chair, AOS Affiliated Societies Committee  
([dluceroaosmembership@gmail.com](mailto:dluceroaosmembership@gmail.com))

### AFFILIATED SOCIETIES

We're excited that October, along with the AOS Fall 2018 Member's Meeting, is finally here. We hope you've already registered and that we'll see you in Apopka, Florida. Online registration is at: <https://aosmembersmeeting.com/>

Thanks for all the pics that you are sending in for the Instagram feed. The feed just gets better and better. Personally, I'm loving all the AOS award pics! We have some amazing growers out there! Our Instagram Administrator, Candace Hollinger, sends her appreciation to you all. It's wonderful to see such a variety of everything orchid that's enjoyed around the globe. Please remind your members that we would love pics of how they grow, what's blooming now or anything they love about orchids.

Please continue to send your photos and short videos to: [americanorchidsociety@gmail.com](mailto:americanorchidsociety@gmail.com) Be sure to send a short caption explaining your photo. Also, if you are bilingual and can include your caption in English plus your other language(s)—it will help with our universal outreach.

Remember to check-in on our Facebook Group Page for Affiliated Societies of the American Orchid Society. We've recently updated the posting rules for the page, so take a look at the "Announcements" at the top of the feed. We always help each other by sharing so we've expanded and now allow Show Posters to be shared. Let us know how your show went and what was successful for you or what didn't quite make the mark. Our administrator, Chad Brinkerhuff, monitors the feed and is a great resource for all that the AOS has to offer. Keep us up to date on what's going on at your local society and let us know how we can help you.

### YOUR SOCIETY CAN EARN FREE AOS MEMBERSHIP EXTENSIONS:

Upcoming shows are a good time to encourage **new** membership to AOS. Affiliated societies can now earn a one-month extension of their AOS society membership for each **new** AOS member that they refer (note: membership renewals don't count). Make sure to note your Society Affiliation in the comments section of the application.

*With twelve new AOS members, your affiliated society can have a FULL YEAR OF FREE AOS membership!* Be sure to have membership applications with your society's name already filled in and available at your club meetings!

Remember to let your members know, we want to sweeten the deal and give them every possible reason to join AOS today! If they become an American Orchid Society member, they have considerably more resources at their disposal making growing orchids even more enjoyable and successful.

***Let's grow together, Denise Lucero***

## CULTURAL SPOTLIGHT: Questions and Answers

~ Sandra Tillisch Svoboda

This is a re-print of an article from Orchids magazine, October 2013.

### BRINGING PLANTS BACK INDOORS

#### QUESTION:

*My plants are summered out-of-doors on a balcony against a wall. Fall is coming and I have to decide what to bring in and when. I thought I'd leave the phalaenopsis, coelogynes, lycastes, bifrenarias, Oncidium Alliance plants, dendrobiums and my miltonias out, especially the phalaenopsis because I understand they need cooler temperatures to induce flowering, but bring in my paphiopedilums and catasetums now. Your comments would relieve my mind. Thank you. — Anonymous.*

#### ANSWER:

Your decision as to when to bring in will depend on the weather forecast and the temperature tolerances of your plants. I have listed below the temperature recommendations for the different genera you are growing. This should help you plan your move inside.

**CATASETUM** Most of these orchids are native to hot tropical areas and grow during the rainy summer months. During this growing period, day temperatures of 80–100 F (27–38 C) and night temperatures of 60–65 F (16–18 C) are beneficial. After growths mature, temperatures can be reduced to 55 F (13 C) at night, with day temperatures of 70–85 F (21–29 C).

**PHALAENOPSIS** These should usually be above 60 F (16 C) at night and range between 75–85 F (24–29 C) or more during the day. Although higher temperatures force faster vegetative growth, higher humidity

and air movement must accompany higher temperatures, the recommended maximum being 90–95 F (32–35 C). Night temperatures to 55 F (13 C) are desirable for several weeks in the autumn to initiate flower spikes. Fluctuating temperatures can cause bud drop on plants with buds ready to open. This is especially true when the buds are about the size of a pea and is the leading cause of bud drop at that stage.

**PAPHIOPEDILUM** Paphiopedilums generally enjoy the same temperatures that we do in the home; ideally, 60–65 F (16–18 C) at night and 75–85 F (24–29 C) during the day. Paphiopedilums can be grown outside in mild climates and can stand temperatures up to the high 90's F (35–37 C) and down into the 40's F (5–9 C) for short periods. In fact, many of those that produce multiple flowers per spike actually need short periods at cooler temperatures in order to flower.

**COELOGYNE** This is a diverse group of plants with many different requirements depending on where the species grow. You first need to determine whether the plants you have are cool, Intermediate or warm growing. Those that produce single flowers in succession (Coelogyne Bird in Flight is a good example) are typically warm growers as are those that produce large numbers of green flowers (*Coelogyne pandurata* for instance). Many of the white flowered species and their hybrids, especially the larger flowered whites like Coelogyne Memoria W. Micholitz are generally cool growing.

**LYCASTE** In an article in *Orchid Digest*, Steve Gettel says to grow these orchids warm while actively growing: 60–85 F (16–29 C). This author grows *Lycaste Brugensis (longipetala × skinneri)* warm (minimum night temperature of 65 F [18 C]), on the advice of Henry Oakeley (personal communication), but all others are in the cool house during autumn and winter, where they receive a minimum night temperature of 48 F (9 C).

**BIFRENARIA** These are intermediate to warm growing plants and should generally be kept about 60 F (16 C) at night.

**ONCIDIUM** Temperatures for this group are generally considered intermediate to warm: 55–65 F (13–18 C) at night and 80–85 F (27–29 C) during the day. Temperatures up into the high 90's to 100 F (35–38 C) are tolerated for short periods if humidity and air movement are increased as the temperatures rise; a good general rule in any case. The exceptions to this temperature regime are those plants formerly included in *Odontoglossum* and their intergeneric hybrids. These plants are usually recognizable by their bright white or red, solid or patterned flowers. These are distinctly cool growing plants and intolerant for all but the briefest periods of high temperatures. For these plants day/night temperatures should be 70/50–55 F (21–24/10–13 C).

**DENDROBIUM** This is another very large, widespread cosmopolitan genus and to grow them well you need to determine to which group your particular plants belong. You can find a good summary describing the cultural requirements of the main groups here: <http://www.aos.org/orchids/culture-sheets/dendrobium.aspx>.

**MILTONIA** There are two distinctly different genera that are commonly referred to as miltonias. Those with star- or spider-shaped flowers are intermediate to warm growing and should be treated like the other similar plants in the *Oncidium Alliance*. The other genus, properly called *Miltoniopsis*, has flowers reminiscent of pansies and gives them their common name pansy orchids. While *miltoniopsis* certainly will not tolerate the extremes of temperature that a *cattleya* or *vanda* might, they by no means require - or like the almost frosty treatment in which most "odonts" delight. Night temperature is not a critical factor in our experience, as we have grown our *miltoniopsis* with both paphs (55–58 F [13–14 C] nights) and phalaenopsis (65–68 F [18–20 C] nights) with good success. Night temperature should be kept at or below the high range, however, for best growth. *Miltoniopsis* will tolerate down to 50 F (10 C) at night if kept on the dry side (but not bone dry). Young seedlings will, of course, prefer the warmer range of night temperature while mature plants should be run at 58–62 F (14–17 C) nights. The day temperature seems to be the critical factor for *Miltoniopsis* and should be kept to an 80–85 F (27–29 C) maximum whenever possible. Much of this information can be found on the AOS website at <http://www.aos.org/orchids/culture-sheets/miltonia.aspx> and the links found there.

~ *Sandra Tillisch Svoboda* is President of the World Orchid Conference Trust, Past President of the American Orchid Society, and Chair of the AOS Education Committee. Along with being an accredited judge in AOS and CSA judging systems, she is Editor in Chief of the *Orchid Digest* along with a myriad of other positions she loves holding in the orchid community

**Upcoming Meetings & Events:**

- October 7, 2018 - 2 pm  
Guest Speaker: Carson Whitlow  
Topic: Native Orchids
- November 4, 2018 - 2 pm  
TBD
- December 2, 2018  
CNYOS Annual Holiday Dish to Pass

**Refreshment Volunteer List:**

- October 7, 2018  
Donna Coleman/Jack & Deb Hasse  
Beverages: Honey Goshorn
- November 4, 2018  
Barbara Weller/Lori Burritt  
Beverages: Bob Pfromm
- December 2, 2018  
Annual Holiday Dish to Pass

**MID-HUDSON  
ORCHID  
SOCIETY  
Fall 2018**

**ORCHID SHOW & SALE  
Saturday, October 20, 2018**

11:00 AM to 3:00 PM

at the

Union Presbyterian Church, 44 Balmville Road, Newburgh, NY 12550

**DIRECTIONS FROM INTERSTATE 84**

Take Interstate 84 to exit 10.  
Proceed north on Route 9W and make a right at the traffic light onto Chestnut Street (there is an M&T Bank branch on the west side of Route 9W at this intersection; it is less than a mile once you get off at exit 10).  
Proceed to the stop sign and make a right onto Balmville Road.  
Proceed approximately 1/4 mile and make a left onto Beech Street. The parking lot is on the left.  
Entrance to the community center is off the parking lot.

For further information, call Ruth Nattas  
**845-343-2901**

**Sunday Oct. 7  
REMINDER:**

The Club will be taking the guest speaker, Mr. Carson Whitlow, out to dinner at Lock 24 following the meeting. Everyone is welcome to join in (at your own expense).

## Class Awards: CNYOS Orchid Show & Sale September 29-30, 2018
